- ✓ All learners to receive LfS entitlement by 2030.
- ✓ Every 3-18 school and setting to be sustainable by 2030.

**Target
2030**

<https://bit.ly/LfSActionPlan>

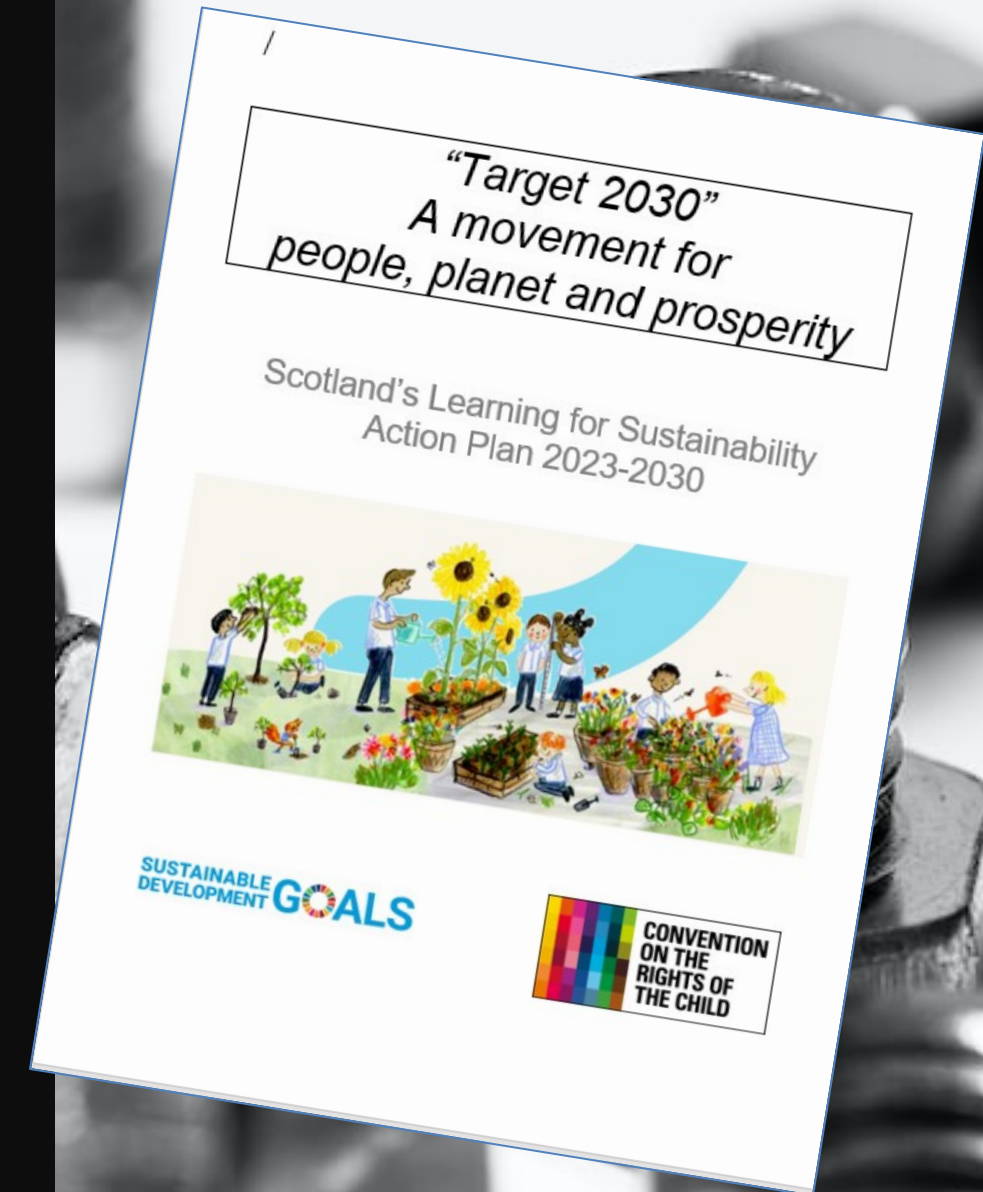

Target 2030: A movement for people, planet and prosperity

Ambition: To build an inspiring movement for change so every 3-18 place of education becomes a Sustainable Learning Setting by 2030.

Key themes

- Leadership and Collaborative Partnership
- Learning, Teaching, Curriculum and Assessment
- Learning Environment and Resources
- Learner Voice, Choice and Action
- Meaning and Understanding

Actions: 25

A low-angle, upward-looking photograph of several modern skyscrapers with glass facades, set against a bright blue sky with scattered white clouds. The buildings are arranged in a way that they appear to converge towards the top of the frame, creating a sense of height and scale. The glass reflects the sky and each other, adding depth and texture to the scene.

HOW DO WE BUILD **A MOVEMENT** FOR CHANGE?

TEACH THE FUTURE [Home](#) [England](#) [Scotland](#) [Volunteer](#)

Our learning needs to reflect the severity of the climate crisis.

We demand reform to the education system.

Future vision - Learning for Sustainability

The current generation of learners see climate change as one of the most significant issues facing their futures and, as such, must be recognised as a key driver influencing the future of our education system.

All efforts, whether concerned with educational recovery post-pandemic or in terms of the future vision for Scottish education, must be directed to the purposes described in Article 29 of the UNCRC.

June 2023

THE FUTURE?

Futures of Education

Reimagining how knowledge and learning can shape the future of humanity and the planet.

...vast numbers of people – children, youth and adults – are keenly aware that we are connected on this shared planet and that it is imperative that we work together.

Teaching should be further professionalised as a collaborative endeavour where teachers are recognised for their work as knowledge producers and key figures in educational and social transformation.

Curricula should emphasise ecological, intercultural and interdisciplinary learning that supports students to access and produce knowledge while also developing their capacity to critique and apply it.

Schools should be protected educational sites because of the inclusion, equity and individual and collective well-being they support – and also reimagined to better promote the transformation of the world towards more just, equitable and sustainable futures.
