Learning for Sustainability Scotland

Learning for Sustainability – and building a movement for change.

'Target 2030: a movement for people, planet and prosperity':
Scotland's refreshed national Learning for Sustainability action plan

"To build an inspiring movement for change so every 3-18 place of education becomes a Sustainable Learning Setting by 2030."

"A Sustainable Learning Setting is about every aspect of the learning context. It is about what and how students learn, how the setting manages its physical environment and resources, how staff and learners relate to each other, how they work with their local community, and how they reach out to the wider world."

January 2024

A New Year of Learning for Sustainability

“

We spend January 1st walking through our lives, room by room, drawing up a list of work to be done, cracks to be patched. Maybe this year, to balance the list, we ought to walk through the rooms of our lives... not looking for flaws, but for potential.
